

## Bachelor of Science in Behavioral Health (College of Online Learning)

---

**Mission Statement:** The Bachelor of Science in Behavioral Health degree prepares graduates to make a difference in the lives of vulnerable populations through generalist practice positions in a variety of public health organizations, private agencies, and Christian ministries.

To this purpose, the following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Explain human development, mental health, and normal/abnormal behavior.
2. Evaluate professional ethical values, laws, and behaviors which guide professionals in the behavioral health professions.
3. Practice information literacy and case documentation in the areas of basic client assessment, case management, and crisis intervention.
4. Demonstrate professional helping skills with empathy and integrity.
5. Recognize and defend the dignity of individuals within their cultural background.
6. Integrate Christian faith into the behavioral health professions.
