

Bachelor of Science in Allied Health (Pre-Athletic Training, Pre-Occupational Therapy and Pre-Physical Therapy)

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Communicate across a variety of populations and health care professionals.
2. Critically analyze and synthesize data found in professional literature to determine evidence based practice.
3. Integrate and apply knowledge content within the chosen allied health profession.
4. Advance knowledge through research and creative activity.
