

Bachelor of Science in Applied Science and Sustainability

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed.

1. Communicate a scientifically informed world view through writing.
2. Apply the scientific method to research problems in the environmental science field.
3. Use classroom theory to field understanding and application by participation in off campus class opportunities.
4. Use technology associated with the study of environmental science.
