

Recording Technology Certificate

ABOUT THE RECORDING TECHNOLOGY CERTIFICATE

The online Recording Technology Certificate program at Evangel is specifically designed for those working with volunteer team members in a church or ministry setting who need to build foundational media skills. This certificate includes live production elements such as audio, video, and projection.

THIS CERTIFICATE SERVES:

- ▼ Church volunteer teams (large or small) in need of foundational skills in audio, video, and lighting.
- ▼ Theatre production teams
- ▼ Church plants needing installation guidance
- ▼ Recording studio technicians – basic microphone applications, EQ, compression
- ▼ Live event - masters microphone techniques, mixing applications, gear
- ▼ Front of house engineers
- ▼ Monitor engineers

COURSES

- ▼ Introduction to Music Technology
- ▼ Worship Media & Technology
- ▼ Modern Recording Techniques
- ▼ Electronic Music

Certificate Fee: \$255 per course

Program Total: \$1,020

Classes start in January!

Joel Wilson

Joel has worked in media production full time since 2005. He first joined a broadcast company in Dallas, Texas, where he served as audio lead in addition to video production duties. That led to a varied path that has included working as an audio engineer, road manager, video producer, and freelance creative. Although he has composed music for commercials and played on several albums, his musicianship has primarily been an active hobby. In that context he is a multi-instrumentalist, with a focus on bass guitar.

In 2018, he joined the staff at Evangel University to lead the Event Production team, which serves the campus through audio visual support for chapels, concerts, and a myriad of other events. In 2023, he joined as adjunct faculty for the online Recording Technology Certificate program.

Joel is originally from Dallas, Texas, but spent eight childhood years overseas in Germany and Austria. He lives in Springfield, Missouri with his wife, three daughters, and two dogs. In addition to Event Production and teaching, he still takes on a limited number of freelance creative projects each year.
