

College of Arts and Sciences

Natural and Applied Sciences Department

Bachelor of Science in Applied Biology

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Demonstrate ability to know, analyze, and synthesize scientific principles.
2. Demonstrate proficiency in laboratory technique.
3. Develop understanding of function/structure/classification of life.
4. Effectively communicate principles of biology through oral means.
5. Effectively communicate principles of biology through written means.
