

College of Arts and Sciences

Natural and Applied Sciences Department

Bachelor of Science in Chemistry

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Apply theoretical principles, models, and conventions to the study of chemistry.
2. Design and perform experiments using the scientific method.
3. Analyze experimental data to draw conclusions about the physical world.
4. Effectively communicate chemistry concepts through written means.
5. Effectively communicate chemistry concepts through oral means.
