

College of Arts and Sciences

Natural and Applied Sciences Department

Bachelor of Science in Computer Science

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Develop an optimal algorithm to solve a problem (Algorithm Development and Implementation).
2. Understand the underlying concepts and characteristics of real and conceptual machines (Computer Architecture and System Hardware).
3. Understand the software comprising a computer system (System Software).
4. Effectively communicate technical information both orally and in writing (Communication Skills).
