

College of Online Learning

Associate of Applied Science in Accounting

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Apply Fundamental Accounting Principles
 - Record, classify and summarize financial transactions using Generally Accepted Accounting Principles (GAAP).
 - Prepare financial statements, including income statements, balance sheets, and cash flow statements.
 - Demonstrate proficiency in using accounting software and tools to manage financial data.
 - Calculate and process payroll in compliance with federal and state regulations.
2. Analyze Financial Data
 - Evaluate financial data to support decision-making and strategic planning.
 - Utilize cost accounting methods to develop budgets, manage costs, and improve the financial efficiency of organizations across various sectors.
3. Apply Ethical Frameworks
 - Apply ethical frameworks and Christian values to make sound decisions in accounting practices, promoting integrity, transparency, and accountability in financial reporting and business operations.
 - Explain the impact of legal, regulatory, and ethical standards on accounting practices.
4. Communicate Financial Information
 - Effectively communicate complex financial data and accounting concepts to stakeholders through written reports and oral presentations.
5. Collaborate in Professional Environments
 - Work effectively as part of a team to achieve financial and organizational goals
 - Exhibit professionalism and adaptability in diverse workplace settings.
