

College of Online Learning

Bachelor of Science in Humanitarian Relief and Development

The following Program Learning Outcomes have been established by Evangel faculty to define the areas of knowledge and skills that students graduating from this major degree program should have developed. At the conclusion of this program, students will be able to:

1. Propose a theology of compassion that honors Christ and guards human dignity in its expressions to humanity.
2. Design emergency management plans for communities based on relief principles and best practices.
3. Construct effective sustainable development plans based on currently theory and best practices that are relational, holistic, flexible, and culturally aware for rural, urban, or international settings.
4. Formulate approaches for the effective leadership of personnel, management of resources, and essential communication with all stakeholders for the nonprofit context.
5. Evaluate cultural dynamics between groups whose values differ towards collaborative communications and solutions.
